

GREEN
ENERGY d.o.o.

Why energy projects?

- Energy needs - a constant market growth
- Diversification of business activities
- Dependence on energy
- Energy savings as a contribution to economic and social growth
- EU directives
- Kyoto Protocol

The current energy projects

Cogeneration plant on biomass

- Own needs for electricity and thermal energy
- Community needs for electricity and thermal energy
- Energy as a key future factor
- Reduce air pollution
- Economic and social contribution through the clearing of forests

Briquette factory

- The same raw materials, thus compatible with the cogeneration plant
- Located near the cogeneration plant
